About Us

At the heart of our philosophy is a commitment to academic excellence. Our faculty comprises seasoned experts and leaders in their respective fields, ensuring that our students receive top-notch education and training. We believe in providing a curriculum that combines rigorous scientific principles with a deep appreciation for the diverse healing modalities that contribute to integrative medicine.

The Faculty of Integrative Medicine at RMUTT is at the forefront of cutting-edge research in the field. Our researchers are engaged in projects that explore the efficacy of integrative therapies, contribute to the development of new health products, and advance our understanding of the complex interplay between lifestyle, and overall well-being.

Why Choose Us?

- ★ Innovative organization
- ★ Maintaining morality and ethics
- ★ Managing all public health
- ★ Effective collaboration
- ★ Aiming for ultimate greatness
- ★ Creating entrepreneurs who create innovations
- ★ Having responsibility for society and the environment

Undergraduate Programs

1

Bachelor of Applied Thai Traditional Medicine

A hand on program integrates traditional Thai healing practices with a practical healthcare approach, providing students with a comprehensive understanding of herbal remedies, massage therapies, and holistic wellness. The curriculum combines theoretical knowledge with hands-on training, preparing graduates to contribute to healthcare with a unique focus on Thai traditional medicine's rich heritage.

3

Bachelor of Science Program in Innovation of Health Products

A multifaceted curriculum empowers students with the expertise to advance healthcare through a blend of scientific principles, technology, and business acumen. They conduct cutting-edge research and practical applications to contribute to innovative health product development, enhancing patient care.

Graduate Programs

Master of Science Program in Complementary & Alternative Medicine

4

An interdisciplinary approach to alternative healthcare modalities, fostering a deep understanding of non-conventional healing practices. Emphasizing evidence-based research and clinical application, graduates are prepared to contribute to the evolving field, promoting integrative healthcare.

Short Course Training

Bachelor of Science Program in Health & Aesthetics

2

This program equips students with a strong foundation in health sciences while exploring the intersection of beauty, wellness, and healthcare. Students engage in a diverse curriculum that covers anatomy, physiology, skincare, and aesthetic principles, preparing them for careers at the intersection of health and beauty industries.

Programs in Collaboration with Department of Health Service Support

5

In synergy with the Department of Health Service Support, our programs embody a harmonious alliance, fostering a holistic approach to healthcare. Together, we sculpt a narrative of wellness, where innovation converges with compassion, creating a tapestry of services that transcends boundaries and cultivates a healthier future for all.
